EXPERIENCE

Cyntra AI

Feb 2025 – Present

Software Engineer Intern | Python, SQL, FastAPI, React, RESTful API

Noida, Uttar Pradesh, India

- Worked on product usage insights, analyzing key business metrics.
- Developed a **React**-based report dashboard by extracting data using **FastAPI**.
- Contributed to a **2%** increase in client acquisition through data-driven insights.

Outlier AI

Sep 2024 – Feb 2025

Freelancing: AI Analyst | Python, SQL, Flask, Prompt Engineering, Gen AI, LaTeX

Remote, India

- Optimized GenAI response generation for large language models.
- Employed **Prompt Engineering** methodologies to enhance model reliability.
- Achieved a **95%** improvement in accuracy for models with **Reinforcement Learning with Human Feedback (RLHF)**.

GOOGLE Summer of Code 2024 - VideoLAN

May 2024 – Aug 2024

Open Source Contributor | C++, Qt, QML, Docker, Git — [GitLab](#)

Remote, India

- Redesigned the Qt interface for **VLC - 4.0**, achieving a **75%** boost in UI performance.
- Worked on tools and frameworks like **Docker**, **CMake**, **Linux**, and **GammaRay**.
- Received an invitation to the Video Dev Days 2024 conference in Seoul, South Korea.

TECHNICAL SKILLS

Programming Languages: C++, Python, SQL, Qt, QML

Backend Tech: FastAPI, Restful API, Flask, Gen API (Gemini), Node.js, Express.js

Frontend Tech: HTML, CSS, Bootstrap, React.js, Redux

Databases: MySQL, NoSQL (MongoDB), MS Excel

Version Control: Git, GitHub, GitLab

Cloud: Docker

Operating Systems: Linux (Ubuntu), Windows

Core Subjects: Data Structure and Algorithm, Object-Oriented Programming (OOP), Data Science and Operating System

PROJECTS

Backend Project: E-commerce Data Pipeline & Insights API

FastAPI, Python, REST APIs, Requests, JSON, Data Processing — [Project Link](#)

- Developed a FastAPI-based data pipeline to extract, transform, and analyze product, transaction, and user data.
- Implemented data enrichment by linking transactions with product and user details.
- Designed API end-points to provide insights like most popular product category, total user spending, and average transaction value.

Travel Alchemy: Your Personalized Travel Planner

Python, Flask, Gemini API, HTML, CSS — [Project Link](#)

- Built a dynamic travel planning web app for personalized itinerary generation.
- Implemented secure user authentication and tailored itinerary creation for a seamless user experience.
- Designed a responsive front end with **HTML**, **CSS**, and **JavaScript**, integrating booking platform links.

Online Code Judge Platform

Node.js, React, Docker, Redux, MongoDB, Express — [Project Link](#)

- Developed a platform for practicing Data Structures and Algorithm problems with real-time code execution.
- Added authentication, leaderboards, and efficient question-fetching using **Redux** for state management.
- Created a **Docker based execution environment** and deployed the platform for production use.

ACHIEVEMENTS

- Solved **350+** **Data Structures and Algorithms** problems on LeetCode and CodeChef.
- Selected as one of the **top 0.01%** contributors for Google Summer of Code 2024, out of **63,000** applicants from **172** countries.
- Winner** of CodeRush 2024 at SGSITS, outperforming 500 participants in a **coding competition** organized by AlgoUniversity.

EDUCATION

Shri GS Institute of Technology and Science

2021 – 2025

Bachelors of Technology (B.Tech)

CGPA: 7.50

IIT-JEE Mains 2021

Scored **94.5%** and Ranked **48K** out of **1000K** candidates
